

# Tropicana Overland Borefields Pipework

Value \$3.2M

Works completed as Watpac Civil & Mining  
**Director's involvement – Tim Malseed – Operations Manager**

## FACTS

<b>Client</b>	AngloGold Ashanti	<b>Division</b>	Civil and Mining November
<b>Contact</b>	Massoud Massoudi	<b>Commenced</b>	2012
<b>Contract</b>	Schedule of Rates	<b>Completion</b>	July 2013
<b>Location</b>	400km ENE of Kalgoorlie, WA		

## PROJECT OVERVIEW

The Tropicana Gold Project site is located approximately 450km east north east of Kalgoorlie WA at an altitude of approximately 400m above sea level.

The works include the establishment and construction of a borefields facility, involving the drilling and installation of a collection of bores and HDPE supply pipes to supply water to the Tropicana Gold Project. The works included the transport, welding and installation of over 25km of HDPE pipe in a variety of sizes and pressure ratings.

## SPECIFICATIONS

- Installation of bore pumps, feed lines and valve systems at established bore locations
- Welding and installation of 12km of coiled HDPE pipe
- Welding and installation of 14km of straight pipe lengths
- Establishment and maintenance of access roads, site facilities and site drainage
- Creation of v-drain catchment bunds
- Installation of valve pits, risers and tee connections.
